FROM QUESTION TO EVIDENCE

One question. A deeper view.

From Korean company filings to earnings, assets and portfolio returns.
Connect OpenProxy to your AI and ask what you want to understand.

ASK

Set the question

Name the company,
period and objective.

→

CONNECT

Bring it together

OpenProxy retrieves data.
Your AI organizes the answer.

→

CHECK

Go one level deeper

Follow the evidence
and ask the next question.

QUICK START

New here? Connect. Connected? Just ask.

No tool names to memorize.
Describe the analysis in plain English.

Connect and ask	02 ↗
Business mix & earnings	03 ↗
Assets & ownership	04 ↗
Dividends & Value-up	05 ↗
Sector P/E & contracts	06 ↗
Returns, risk & contribution	07 ↗
Control contests & proposals	08 ↗
Voting-advice drafts in four steps	09 ↗
Workflows, reference & appendix	10–14 ↗

Updated November 10, 2026. Examples retain their stated historical dates.
OpenProxy supplies data; AI app features and access terms apply separately.

01 / CONNECT

Connect once.
Ask your first question.

MCP lets an AI app use external tools.
Add this server in an app that supports remote MCP connectors.

01 Get an OpenDART API key

DART is Korea's corporate disclosure system. Register at OpenDART ↗ and request a key.

Keep your key private. Do not paste it into a conversation or shared document.

02 Add the server to your AI app

Replace **YOUR_DART_API_KEY** with your key in the connector settings.

```
https://open-proxy-mcp.fly.dev/mcp?opendart=YOUR_DART_API_KEY
```

Menus and availability vary across Claude, ChatGPT and Perplexity.
Setup guide: github.com/MarcoYou/open-proxy-mcp ↗

03 Start a new conversation

"Show Samsung Electronics' company profile and its three most recent filings. Answer in English."

Check the connection

Confirm that your app actually invokes OpenProxy and returns the company and filings.

If it does not work

Check the URL, key, connector activation and your app's access permissions.

Ask in English. Keep the source evidence.

The AI can explain Korean filings in English. Original filings and some source labels remain in Korean.

02 / PERFORMANCE & ESTIMATES

Business drivers and earnings expectations.

Inspect the revenue mix, then find companies with improving profit estimates.

Claude

Show Samsung Electronics' H1 2026 segment revenue, share, year-on-year growth and operating profit, plus key product revenue.

OpenProxy lookup ›

Segment	Sales[1]	Share	YoY	Op. profit[1]
DX	100.68	33.0%	+5.7%	2.15
DS	209.23	68.5%	+294.7%	142.86

[1] KRW trillion. Key products: memory KRW 195.62tn; smartphones and related products KRW 69.80tn.

What drove the change in revenue and profit by segment?

+ Ask a follow-up Claude

CASE 01 / BUSINESS MIX

Which business drives the most revenue?

DS has the largest revenue share and the strongest year-on-year growth of the two segments.

FEATURES USED

Segment results · product sales · filing notes

H1 2026 cumulative, selected items. Reported share of consolidated sales; YoY calculated from prior H1. Segment sales include internal transactions. Do not add products to segments. Note 27 ↗

Claude

For the top 30 KOSPI companies by market cap, compare FY2026 operating-profit estimates on September 12 and October 10, 2026. Show percentage and absolute changes.

OpenProxy lookup ›

Company	Revision	Change · KRW bn
Samsung SDI	+15.73%	+60.67
SK Innovation	+12.72%	+1,110.74

Compare revenue revisions and common sector trends among the upgrades.

+ Ask a follow-up Claude

CASE 02 / EARNINGS REVISIONS

Whose earnings outlook is improving?

Samsung SDI leads in percentage terms; SK Innovation has the larger absolute upgrade.

FEATURES USED

Universe screening · consensus revisions

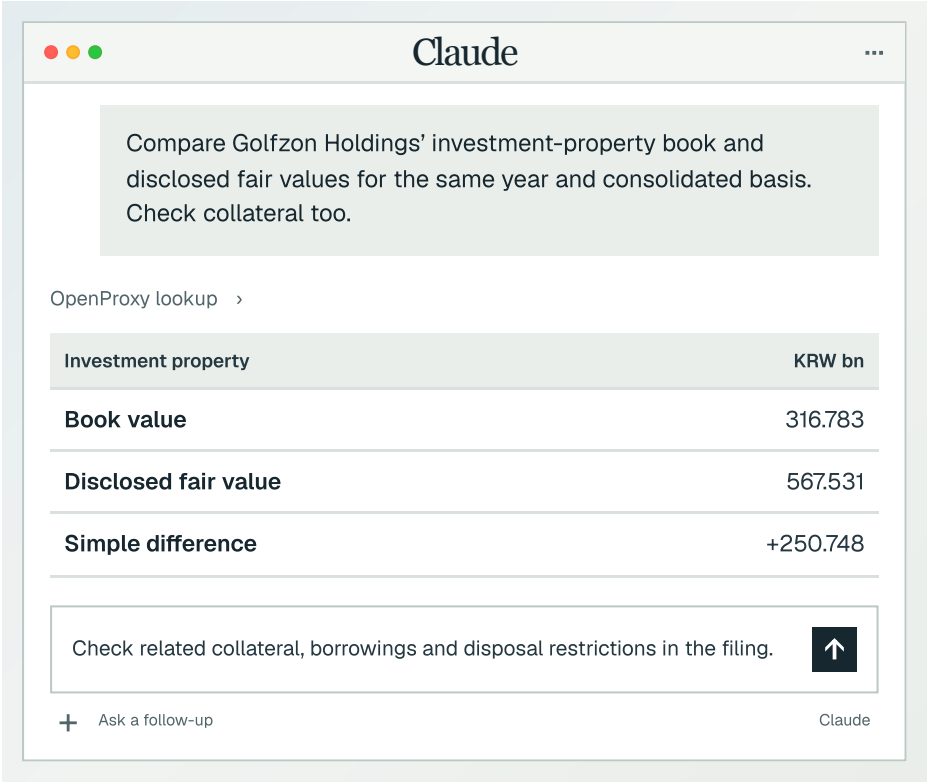

Historical example: Sep 12 to Oct 10, 2026. Common shares ranked by Oct 8 market cap; 30/30 comparable. Estimates, not reported earnings.

Reconstructed from actual tool results; not a screenshot of an AI app. Each example retains its stated dates.

03 / ASSETS & OWNERSHIP

Asset values and shareholder actions.

Compare values in the notes and connect ownership, litigation and meeting filings.

CASE 03 / ASSET VALUES

Find real assets worth more than book value

Find the valuation gap, then inspect the assets and the assumptions behind it.

FEATURES USED

Asset holdings · consolidated filing notes

Year-end 2025, consolidated. Units aligned before subtraction. Not equity NAV after tax, liabilities and other adjustments. Annual filing ↗

CASE 04 / OWNERSHIP & MEETINGS

Follow ownership changes into the meeting agenda

Turn a list of filings into a sequence of events and the next documents to inspect.

FEATURES USED

Ownership · litigation · shareholder meetings

2026 historical example. The two named parties are not confirmed to be the same person. Application stage; meeting resolution checked by title. Litigation filing ↗

Reconstructed from actual tool results; not a screenshot of an AI app. Each example retains its stated dates.

04 / DIVIDENDS & VALUE-UP

Dividend yields and capital-return promises.

Compare confirmed and forecast dividends, then test targets against delivery.

Claude

For Mirae Asset Securities, divide confirmed and forecast dividends by the same share price. Label each dividend year.

OpenProxy lookup ›

Basis	DPS · KRW	Ref. yield
2025 confirmed	300	1.01%
2026 estimate	616.875	2.07%

Screen KOSPI for yields above 5% using 2025 DPS and the latest price.

+ Ask a follow-up Claude

CASE 05 / DIVIDEND YIELD

What yield does the expected dividend imply?

Compare past dividends with forward expectations at a common reference price.

FEATURES USED

Confirmed dividends · estimates · share prices

KRW 29,850 close on Oct 8, 2026; forecast snapshot Oct 10. Forecasts are not guaranteed. Past dividends are not income locked in by buying today. Dividend source ↗

Claude

Compare Mirae Asset Securities' Value-up targets with 2024 delivery, using the company's own definitions.

OpenProxy lookup ›

Metric	Target	2024	Gap
Payout ratio[1]	≥35%	40%	+5pp
ROE	≥10%	7.9%	-2.1pp

[1] Company-defined shareholder-return ratio: dividends plus share cancellations.

Update this same table when the next implementation report is published.

+ Ask a follow-up Claude

CASE 06 / VALUE-UP DELIVERY

Separate capital-return targets from profitability

The shareholder-return target was met; profitability remained an improvement area.

FEATURES USED

Value-up plans · implementation reports

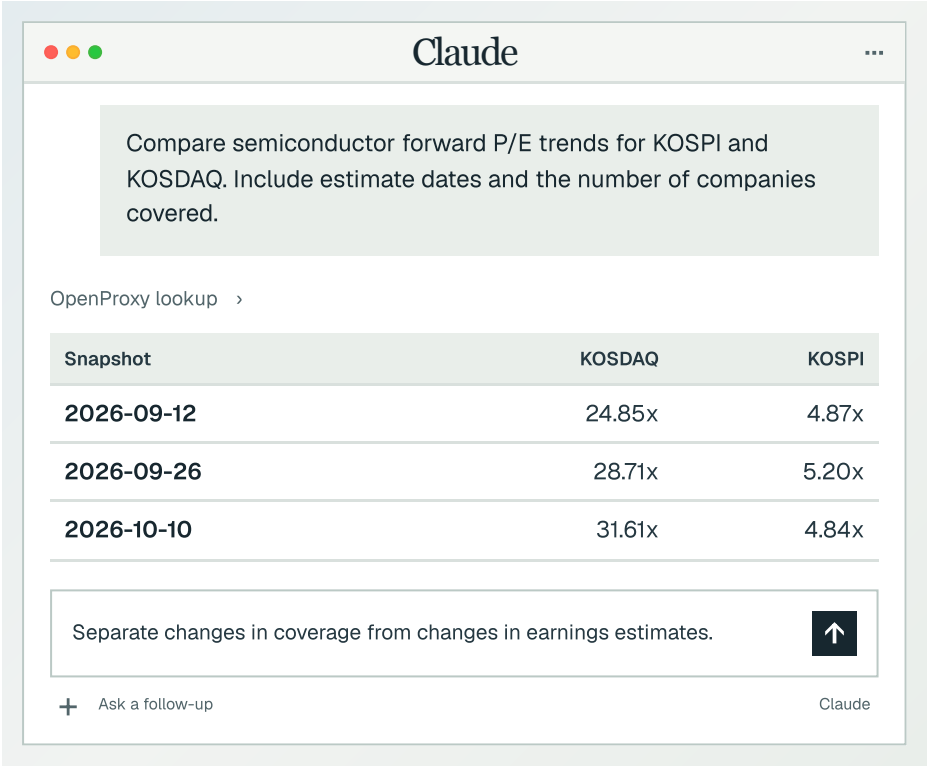

2024 results against 2024–2026 targets. Company-defined dividend + cancellation measure, not an audit of every transaction or a verdict on the full plan. June 2025 update ↗

Reconstructed from actual tool results; not a screenshot of an AI app. Each example retains its stated dates.

05 / SECTORS & CONTRACTS

Sector valuations and material contracts.

Track forward P/E and find orders large relative to a company's sales.

CASE 07 / SECTOR VALUATION

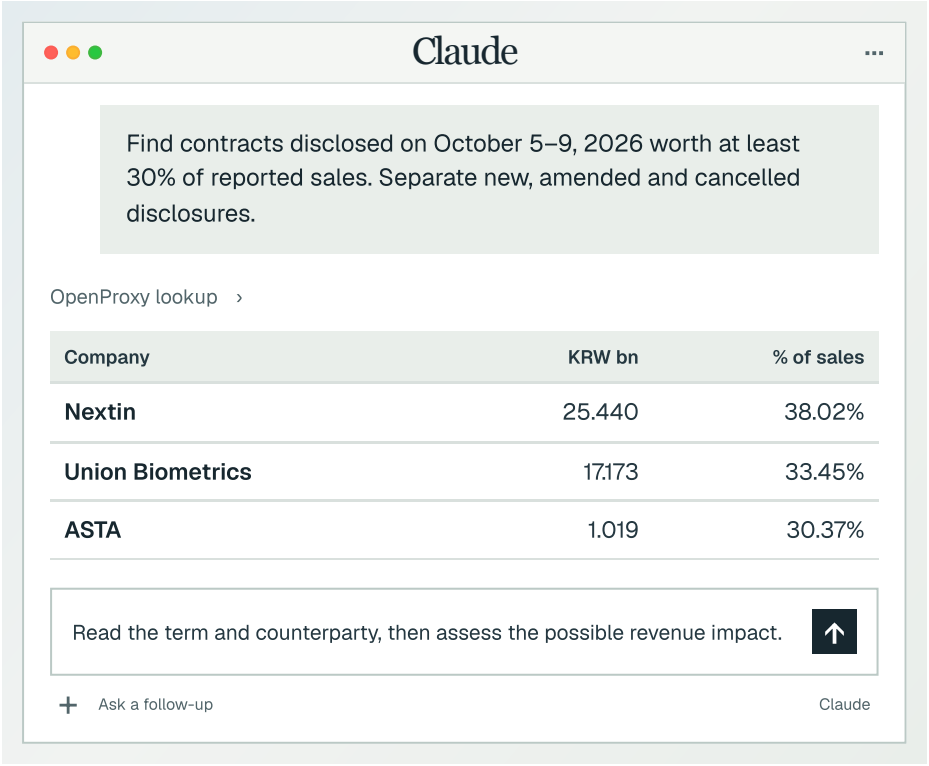

Track forward P/E across markets

The same sector can show different valuation trends across the two markets.

FEATURES USED

Sector valuation · estimate history

Semiconductors & semiconductor equipment, mainly FY2026 forecasts. P/E coverage: KOSDAQ 73→71; KOSPI 11→10. Composition changes included. Latest price date: Oct 8, 2026.

CASE 08 / MATERIAL CONTRACTS

Find orders that matter relative to sales

An order can be material to a company even if its absolute size looks small.

FEATURES USED

Supply-contract search · sales-relative screening

Selected historical results, Oct 5–9, 2026. Of 38 new contracts, 12 had no verified ratio and were excluded. Contract value is not current-period revenue. Nextin filing ↗

Reconstructed from actual tool results; not a screenshot of an AI app. Each example retains its stated dates.

06 / RETURNS & RISK

Returns, risk and the holdings behind them.

Compare a hypothetical basket with the market, then trace its return to each holding.

Claude

Compare a 60% Samsung Electronics / 40% SK hynix basket with KOSPI from Jan 2 to Oct 23, 2026. Exclude dividends; no rebalancing.

OpenProxy lookup ›

Metric	Portfolio	KOSPI
Cumulative return	+76.07%	+28.79%
Annualized volatility	85.67%	59.70%
Maximum drawdown	-49.66%	-39.29%
Sharpe ratio	1.21	0.77

What changes with dividends included or quarterly rebalancing?

+ Ask a follow-up Claude

CASE 09 / RETURN & RISK

How much did it earn—and how rough was the ride?

Compare returns, volatility and drawdowns over exactly the same period.

FEATURES USED

Performance analysis · official index · risk metrics

Jan 2–Oct 23, 2026; daily price returns. Initial weights drift, no dividends. Sharpe uses the 1-year Korean Treasury yield. Hypothetical basket, not an actual account. Methodology ↗

Claude

Break down the same basket's return by stock. Separate each stock's own return from its contribution to the portfolio.

OpenProxy lookup ›

Holding	Stock return	Contribution
Samsung Electronics	+67.70%	+44.96pp
SK hynix	+88.63%	+31.11pp
Total	-	+76.07pp

Show sector contributions for a semiconductor / financials blend too.

+ Ask a follow-up Claude

CASE 10 / RETURN CONTRIBUTION

Which holding drove the portfolio's return?

The strongest-performing stock is not necessarily the largest contributor.

FEATURES USED

Stock / sector contribution · sector attribution

Same hypothetical basket and price-return basis. Carino-linked contributions sum to cumulative return. Sector allocation / selection attribution uses a computed benchmark. Attribution guide ↗

Reconstructed from actual tool results; not a screenshot of an AI app. Each example retains its stated dates.

07 / OWNERSHIP & VOTING

Control contests and shareholder proposals.

Read Korea Zinc's ownership and litigation, then review Palliser's LG Chem proposals.

Claude

As of Oct 25, 2026, map Korea Zinc's disclosed ownership without counting joint holders twice. Add the latest dispute filings.

OpenProxy lookup ›

Reported group[1]	Stake	Filed in 2026
Young Poong / Korea Investment Holdings	41.13%	May 20
Choi Yun-beom + related holders	17.72%	Sep 17
Crucible JV	10.59%	Jan 6

Oct 23 filings: claims in two derivative suits were dismissed on Oct 22. Young Poong and Korea Investment Holdings' holdings overlap.

Break the Young Poong group into individual holders and show the overlap.

+ Ask a follow-up Claude

CASE 11 / KOREA ZINC

Who holds the shares—and what changed?

Connect the ownership map with court developments, then inspect the underlying filings.

FEATURES USED

Joint-holder breakdown · ownership · dispute filings

[1] Latest reports found by Oct 25; dates differ. Reported holdings include related parties, not a voting-power or alliance estimate. These rulings do not establish that the wider contest has ended. Ownership ↗ · Choi ↗ · Crucible ↗ · Ruling A ↗ · Ruling B ↗

Claude

Find Palliser's proposals at LG Chem's Mar 31, 2026 AGM. Use only information available by Mar 30 for an OPM voting review.

OpenProxy lookup ›

Palliser proposal	OPM output
2-7 · Advisory shareholder resolutions	FOR
2-8 · Lead independent director provision	FOR
3-1 · Disclose NAV discount	REVIEW
3-2 · Stock-linked pay / NAV / ROE	REVIEW
3-3 · LGES stake sale / buybacks	REVIEW

Items 3-1–3-3 are tabled only if 2-7 passes. The board recommended against every proposal; non-binding items with no matching rule stay at Review under the active setting.

Compare the board's response and the original proposal text before deciding.

+ Ask a follow-up Claude

CASE 12 / LG CHEM × PALLISER

From shareholder proposals to a voting review

See what each proposal seeks, which votes it depends on, and why the policy output differs.

FEATURES USED

AGM agenda · proposal dependencies · four-step voting advice

25th AGM · Mar 31, 2026. Re-run Nov 10, 2026 on the four-step tool, filings before Mar 30 17:00, default settings (active · decisive): 15 ballots, 12 For · 3 Review, 0 server problems. Not human-reviewed; not vote results or an adviser's view. AGM notice ↗

Reconstructed from actual tool results; not a screenshot of an AI app. Each example retains its stated dates.

08 / VOTING ADVICE NEW

Ask about one meeting. Get a draft for every ballot.

Voting advice runs in four steps. Your AI follows the order on its own; the server supplies facts, policy rules and checks.

STEP 01 · START

Collect everything once

Builds a ballot map from the notice and opens only filings made before the cutoff: articles, audit opinion, proxy solicitations, court filings. ROE, net cash and pay are pre-computed.

LG Chem: 8 filings · 15 ballots · 3 conditional items

STEP 02 · READ

Read only what is missing

Candidate careers, article changes and pay criteria are read section by section, verbatim, never summarized.

LG Chem: 6 sections of the notice

STEP 03 · RULES

Only the rules that apply

Each ballot receives just the guideline rules that can apply. The AI chooses a conclusion within those rules.

LG Chem: 5 pages of applicable rules

STEP 04 · FINISH

Server check, then a report

Unknown rules, out-of-range conclusions and post-cutoff filings are sent back. Once clean, the server writes the report in a fixed format.

LG Chem: 12 For · 3 Review · 0 Against · 0 problems

SHAREHOLDER STANCE

Conservative	Trust management unless performance is weak
Neutral	Start from management, weigh its explanation
Active · default	Critical of management; seeks capital return

FIRMNESS

Decisive · default	Pick a direction; record assumptions
Balanced	Review only if a gap could flip the result
Cautious	Review whenever anything is unconfirmed

ASK LIKE THIS

“Draft voting advice for LG Chem’s Mar 31, 2026 AGM. Use a Mar 30, 17:00 cutoff and a neutral, balanced setting.”

A draft no person has reviewed. No votes are sent.

Approval and actual voting stay with you. The same facts can lead to different conclusions under different settings. Voting-advice guide ↗

LG Chem figures: public server, Nov 10, 2026, default settings, filings before Mar 30, 2026 17:00. Guideline draft not human-reviewed.

09 / MORE WORKFLOWS

More questions. A repeatable research routine.

Use the expanded tools directly, then save a workflow that is useful to you.

MARKET WATCH

Compare indices and rates

"Show the latest KOSPI level and the Korean 1-year Treasury yield, with one-month changes and observation dates."

Official index levels · Treasury-rate history

PRICE SCREEN

Rank a stock universe

"Take the 50 largest KOSPI stocks by market cap and rank them by trading value. Add daily returns and distance from 52-week highs."

Quote ranking · trading activity · 52-week range

DIVIDEND SCREEN

Find yields above a threshold

"Find KOSPI stocks with yields above 5%, using 2025 common-share DPS and latest closing prices. Sort by yield and label both dates."

Dividend screening · DPS year · price date

Prompt recipes, not executed results. Quotes are stored observations, not streaming prices. A 52-week range may be unavailable after a price-adjustment event.

STEP 01

Test

Run the question manually.

STEP 02

Keep the basis

Save dates, scope and filing IDs.

STEP 03

Repeat

Use scheduling in your AI app.

SAVE THIS ROUTINE

"After each successful run, summarize new filings for Samsung Electronics and SK hynix. Separate amendments, skip filing IDs already seen, and include sources."

OpenProxy retrieves and calculates. Your AI app schedules and delivers.

Start with a manual run. Scheduling requires an app that preserves state, authentication and a delivery destination.

10 / REFERENCE

A map of what you can ask.

Start with your research question. Open the linked catalogue for scope and inputs.

COMPANY & FINANCIALS

APPENDIX 01 / SAMSUNG ELECTRONICS

Start with earnings. Drill into the business.

Samsung Electronics conversation · quarterly earnings → segment performance

Claude

Samsung Electronics last 4 quarters earnings results. Answer me in English.

OpenProxy lookup › Earnings · earnings · filings · estimates

Latest four quarters · consolidated · KRW tn

Quarter	Sales	Op. profit	Margin	Net income[1]	Sales QoQ	OP QoQ
2025 Q4	93.84	20.07	21.4%	19.29	—	—
2026 Q1	133.87	57.23	42.8%	47.10	+42.7%	+185.2%
2026 Q2	171.50	89.49	52.2%	71.27	+28.1%	+56.4%
2026 Q3*	195.00	107.40	55.1%	Pending	+13.7%	+20.0%

Profit rose each quarter, while sequential growth slowed.

[1] Attributable to owners. *Q3 preliminary; net income pending. Q4/Q1 and net income use vendor-reported actuals. Preliminary figures came from filing summaries where full text was unavailable.

Filings: Q3 ↗ · Q2 amended ↗

Earnings by each business segment?

+ Ask a follow-up Claude

Claude

Earnings by each business segment?

OpenProxy lookup › Business segments · filing sections · segment notes

Business segments · KRW tn; OP = operating profit

Segment	Q4 2025 OP	Q1 2026 OP	Q2 2026 OP	Q2 sales	Q2 margin
DS	16.41	53.66	89.20	127.52	70.0%
DX	1.34	2.97	−0.82	48.02	−1.7%
SDC	1.96	0.36	0.68	7.49	9.1%
Harman	0.32	0.22	0.41	4.57	9.1%
Total	20.07	57.23	89.49	171.50	52.2%

DS contributed almost all Q2 profit; DX moved into a loss.

Q3 segment results were not yet available. Q4 is FY minus nine months; KRW 0.05tn of profit is unallocated. Segment sales are before eliminations; total sales are after eliminations. Q2 is the quarter, not H1.

Filings: FY2025 ↗ · 9M2025 ↗ · Q1 ↗ · H1 ↗

What about dividends and the Value-up plan?

+ Ask a follow-up Claude

Actual conversation excerpted and reformatted; figures retained. Charts redrawn. This is a usage example, not an independently verified research report.

APPENDIX 02 / SAMSUNG ELECTRONICS

Connect capital returns with the AGM.

Samsung Electronics conversation · dividends and plans → agenda and voting

Claude

Last 8 quarters dividends and disclosed Value-up plan?

OpenProxy lookup › Dividends & Value-up · dividends · Value-up · buybacks

Eight reported quarters · common shares

Quarter	DPS · KRW	Quarter	DPS · KRW
2024 Q3	361	2025 Q3	370
2024 Q4	363	2025 Q4	566
2025 Q1	365	2026 Q1	372
2025 Q2	367	2026 Q2*	374

Value-up plan · disclosed Mar 19, 2026

Period	Policy / delivery
2024–26 policy	Return 50% of cumulative free cash flow
2024–25 delivery	KRW 20.9tn dividends + KRW 8.4tn buybacks for cancellation
2026 plan	KRW 9.8tn regular dividends; surplus may fund extra returns

*Q2 DPS needs original-filing confirmation: the answer flagged a conflict between two tool outputs. Q3 2026 dividend was pending. The plan's extra-return passage was truncated; buybacks and cancellations are distinct.

Filings: Q2 ↗ · Value-up ↗

Show the latest AGM agenda and voting results.

+ Ask a follow-up Claude

Claude

Most recent annual general meeting agenda items and voting results?

OpenProxy lookup › AGM & voting results · meeting notice · voting results

57th AGM · Mar 18, 2026 · attending-share basis

Item	Agenda	For	Against
1-1	Remove cumulative-voting exclusion	99.9%	0.1%
1-2	Reflect Commercial Act amendments	99.9%	0.1%
1-3	Revise director terms	84.9%	15.1%
1-4	Remove share-cancellation article	99.9%	0.1%
2	Approve financial statements	98.9%	1.1%
3	Elect Kim Yong-kwan	94.1%	5.9%
4	Elect Heo Eun-nyeong / audit committee	85.6%	14.4%
5	Approve director pay limit	99.7%	0.3%
6	Treasury-share holding / disposal plan	99.9%	0.1%

Selected rows from the answer. Dissent was highest on director terms and the audit-committee nominee; the filings cited do not explain why shareholders dissented.

Filings: Notice ↗ · Results ↗

Link each agenda item to its filing.

+ Ask a follow-up Claude

Actual conversation excerpted and reformatted; figures retained. Charts redrawn. This is a usage example, not an independently verified research report.

APPENDIX 03 / SAMSUNG ELECTRONICS

Trace ownership changes. Then visualize.

Samsung Electronics conversation · holder changes → trends and transfers

Claude

Recent share holding changes?

OpenProxy lookup › Ownership changes · ownership structure · joint holders

Latest change report · filed Oct 13, 2026

Holder	Change · shares	Holding after	Stake
Hong Ra-hee	−7,667,100	65,311,600	1.12%
Lee Jae-yong	+7,667,100	105,081,296	1.80%
Group total	−37,331	1,151,569,659	17.32%

The matching family transactions change individual holdings, not the family's combined total.

Separate 5% reports · Samsung C&T and joint holders

2025/05	2025/10	2025/11	2026/01	2026/04	2026/10
20.16%	20.14%	19.84%	19.83%	19.70%	19.69%

The two report types use different share bases: 17.32% and 19.69% are not directly comparable. The answer did not verify the exact denominator difference, transaction price or reason.
